MDF Recycling

BGI's Waste Wood Boilers can offer an environmentally sound solution to costly MDF waste disposal. If you pay to dispose of your MDF waste then we can solve your problem with our simple, easy to follow process.

Our Biokompakt® Austrian made specialist wood boilers can burn your waste within DECC approved emissions limits (certificated) and we can provide you with a way to use the heat to dry other products, or heat your premises.

We offer fully funded solutions, at no cost to you, or you could buy it and keep the revenue from the Renewable Heat Incentive.

We are the only UK company with full accreditation for MDF.

To find out more, give us a call on **01494 757055**.

"Our work within the Waste Wood sector is revolutionising the way in which waste products are now viewed and utilized as a source of cost effective, green energy."

- The Barclays Farming Fund
- Our Kostrzewa biomass boilers in action

The BARCLAYS Farming Fund

Barclays is making £100m available in loans to boost the UK agriculture sector, to help future-proof the industry for the next generation, improve efficiency and create additional revenue streams to limit effects of market volatility.

The multi-million pound fund will be available for farmers looking to modernise their infrastructure, helping to streamline their farming processes and increase efficiency. It will also assist farmers looking to reduce their farm's exposure to market volatility by providing funds to invest in viable diversification projects either within agriculture or from non-agriculture sources.

The fund is in addition to the on-going support that Barclays offers to the sector. Loans from the fund have fixed fees starting at 0.6% for a loan term of zero-five years, 0.75% for loans that are six-10 years and rising to 0.90% for loan terms of 11-15 years.

Mark Southern, Head of Agriculture said: *"We are committed to supporting British farming and we are dedicating £100m in lending solely for use within the farming industry to help boost the industry's profitability and efficiency. This fund will provide essential investment; the fund will also make it easier for farmers to find alternate sources of income, decreasing the impact of price volatility on farm incomes."*

The fund comes at a time when the UK agriculture sector faces a number of challenges that have placed increasing pressure on farmers. From concerns about commodity prices, which have remained steadfastly low, to poor weather impacting output, adding further pressures to the industry.

Oliver McEntyre, National Agricultural Strategy Director added: *"After the turbulent times of the last few years, many farm businesses have found ways to improve efficiency, and this fund is released to assist the progression of this – it is not about increasing production, it is about helping our customers access the finance to invest in producing the same quality and quantity of product for less cost, or finding solid alternative income streams."*

Barclays supports over 20,000 UK farmers and, with a team of over 120 Agriculture Managers across the UK, has one of the biggest agriculture banking team's in the UK making it Britain's leading agricultural bank.

Become a BGI Accredited Installer

BGI are the UK's exclusive distributor of the Biokompakt® and Kostrzewa range of biomass boilers. Accredited Installers are fully trained in assessing, installing and maintaining these latest innovative boilers.

By joining the **BGI Partner Programme**, all installers undertake a full day of training held at the BGI HQ in Bucks. The day comprises both classroom style learning and practical installation training in our Showroom. **The cost of the training day is £95 which is fully refunded upon placement of first order.**

Training Courses run at regular intervals every month

As well as in-depth training on the Biokompakt® and Kostrzewa range, you will also learn about alternative, low cost fuels such as **waste wood** and **waste to fuel conversion**, opening up a whole new market for you and your company.

BGI are planning for the future degression in RHI with ongoing research and development of new markets.

We look forward to sharing our extensive knowledge on locally sourced, alternative biomass fuels.

Romsley Country Store have been heating their premises since 2014 with two of our Kostrzewa biomass boilers:

"Back in 2014 we installed two 100kW Kostrzewa boilers, to provide heating and hot water to our Country Store, and have been extremely happy with them. We have not experienced any technical problems and they are so easy to maintain, with very little that can go wrong, so would definitely recommend these affordable boilers to others who wish to switch to renewable heating."

- Martin, Romsley Country Store.
