OCTOBER NEWSLETTER

Bio Global Industries Ltd — Monthly Newsletter

October 2015

Emissions Testing

Later this month, we are heading over to the Biokompakt HQ in Austria to test two types of fuels for their emissions. Both Miscanthus pellets and wood waste chip will be tested in our dedicated laboratory and we look forward to publishing the results shortly.

Small Scale District Heat Scheme

Recently installed and now fully operational, the 50 kW unit is performing brilliantly and is delivering ample amounts of fuss-free, carbon neutral heat to a local office and adjoining farmhouse. The full Case Study will shortly be available on the BGI website.

“October and November are very exciting months for us at BGI with much activity at key industry events and a fantastic media surprise that will be revealed in our next newsletter.....watch this space!”

Managing Director, BGI Ltd.**

The Installation at Tiles Farm—Small Scale District Heat Scheme

In This Issue

- Emissions Testing
- Small Scale District Heat Scheme
- New opportunity at BGI
- The BGI Autumn Roadshow

The BGI Autumn Roadshow

We have a busy events schedule for the coming months and will be exhibiting at two key events where we will be demonstrating how you can 'Grow Your Own' biomass fuels and become fuel independent.

The first event on the 21st October is with the GMG Golf Club Expo at Lingfield Racecourse where we will be showcasing our specific Golf Club biomass solution.

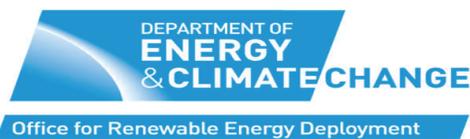

On the 11-12th November, we will be exhibiting and speaking at the Farm Business Innovation Show being held at the NEC in Birmingham. Again, the focus will be on growing your own biomass crops and we will be demonstrating how you can also utilize animal manure as fuel for our multi-fuel biomass boilers. Contact us directly for FREE TICKETS!

Sales Opportunity at BGI

We are looking to expand our team at BGI and will soon be recruiting within our Sales Team. If you may be interested and would like to find out more, please contact us directly.

Food for thought.....Could Biomass be the next Solar in 2016?

Since the recent Decc cuts earlier this summer, there is concern within the industry that biomass could be next to be hit. If the RHI subsidies are cut further, we at BGI have boilers that can 'future proof' against such changes. Our Biokompakt boilers are 'multi-fuel' and can burn a wide range of alternative biomass fuels.
